TREASURE  ISLAND  
DEMONSTRATION GARDEN

## Let it Grow at Treasure Island Demonstration Garden

The Treasure Island Demonstration Garden is an award-winning public garden that features hundreds of plants that flourish in Windsor. It is one of only 70 Plant Select program demonstration gardens in a five-state region.

The Plant Select program features plants that are durable, resilient, non-invasive, and unique, based upon research conducted by Colorado State University and the Denver Botanic Garden. These special species thrive in western gardens, resist disease, and tolerate low-water conditions.

**In June, Treasure Island was selected as one of two award-winning gardens in the region and was awarded the Showcase Garden Award.**

The garden is open for public viewing from sunrise to sunset, and is located adjacent to Laku Lake Road, along the Poudre River Trail, south of Eastman Park. Roadside parking is available via the 7th Street entrance. Most of the garden is accessible with paved surfaces.

Garden volunteers are available to speak on particular subjects or to provide an overview of the garden. Tours are available as long as the weather permits. For more information, call the volunteers at 303-726-7634.

*Volunteers maintain the garden on Tuesday, Wednesday, and Thursday mornings from 9 a.m. to noon, during the growing season. No experience necessary; we train!*

*Spring will arrive more quickly than we think; watch for the garden kick-off meeting in the Winter Activity Guide!*
